

ELAM 5 new generation briefly described

The ELAM 5 new generation combines the best existing features with a huge number of new functions. It offers highest performance in a modern design and is very easy to use. Not only a benefit for new customers but also for upgrading existing customers. Find out what is new in our [one page briefly description](#).

ELAM Logistics

For an efficient manufacturing process you need a form of production logistics that supplies your assembly stations optimally with materials at a consistent, high level. Too complex? ELAM can connect your production and logistic departments in the best possible way! Read [more](#) about how ELAM creates an ecosystem with all the bridges and connections your company needs.

Market leader for e-bikes and cargo bikes optimizes production with ELAM

More and more people want to make their daily mobility sustainable with e-bikes. In this fast growing market the challenge of a large e-bike manufacturer from Germany was to optimize and stabilize the assembly process. And that was solved with our ELAM system! Thanks to the easy way to use the customer was able to do all the start up by himself. Read [here](#) which processes we have already optimized with our **ELAM system**.
