

The new **ELAM** generation is modern designed and is very easy to use. Despite the huge number of functions it offers highest performance. We have succeeded in developing the best features of our previous **ELAM** generation in our new generation **ELAM 5**. Existing customers will appreciate the upgrade option and new customers will benefit from our long term experience.

ELAM 5 new generation has a central landing page to access the areas: administration, assistant and analysis.

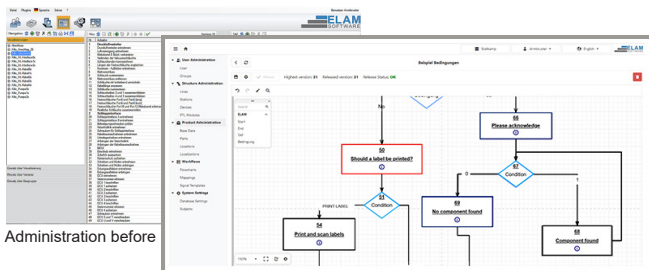

Administration

Assistant

Analysis

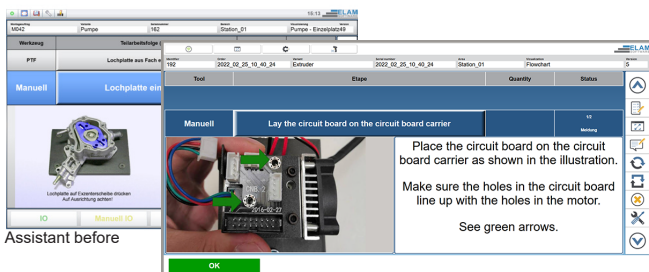

Administration before

New Administration

Administration

Modules for system configuration

- New design for better overview
- Graphical process description with flowchart editor
- Dynamic process with branches
- Configuration per drag and drop
- Visual feedback in case of misentries
- Sequencing of production orders

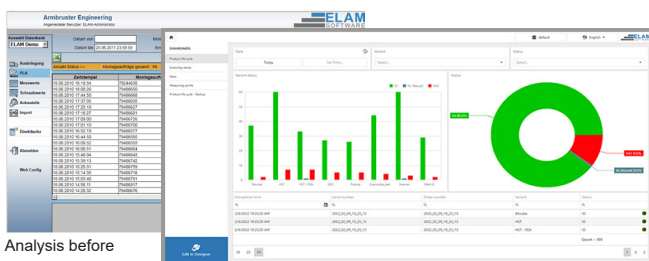

Assistant before

New Assistant

Assistant

Step-by-Step work instruction

- Clear visualization of work steps
